PROFESSIONAL EXPERIENCE

Intern Luminar Technolab   05/2024 – present
ME(A)RN Stack Developer   Calicut
- **React**: Proficient in building user interfaces, managing state with hooks, and component-based architecture.
- **Node.js**: Basic understanding of server-side development and JavaScript runtime.
- **JavaScript**: Strong grasp of asynchronous programming, and DOM manipulation.
- **RESTful APIs**: Knowledge of building and consuming APIs in a MEARN stack environment.
- **Version Control**: Experience with Git and GitHub for version control and collaboration.

PROJECTS

Zebronics Clone App
Developed the front-end of a Zebronics e-commerce platform clone, replicating the design and user experience of the original website.
- **Technologies used :** HTML, CSS, JavaScript,Bootsrap
- **UI/UX Design**: Recreated the interface to match the original site, focusing on user-friendly navigation and responsiveness.
- **Responsive Design**: Ensured compatibility across different devices and screen sizes.

Contacts Crud Application
Built a simple contact management application with full CRUD (Create, Read, Update, Delete) functionality.
- **Technologies used**: React, JavaScript, HTML, CSS, Bootstrap
- **Core Features**: Add, edit, delete, and view contact details with form validation.
- **State Management**: Utilized React hooks for managing form inputs and application state.
- **Responsive Design**: Ensured the app is fully responsive and user-friendly across devices.
